

100% American-made DeltaPValves are available for projects falling under the requirements of the American Recovery and Reinvestment Act of 2009

Flow Control Industries certifies that all DeltaPValves meet the requirements of the American Recovery and Reinvestment Act of 2009. Furthermore, we believe that Flow Control Industries is the only pressure-independent control valve manufacturer that can produce its full range of valves (½” – 16”) with 100% American-made components.

The American Recovery and Reinvestment Act of 2009, passed on February 17th, 2009, appropriated funds in the amount of \$787 billion dollars for new projects. Section 1605 of the Act specifically states:

“None of the funds appropriated or otherwise made available by this Act may be used for a project for the construction, alteration, maintenance, or repair of a public building or public work unless all of the iron, steel and manufactured goods used in the project are produced in the United States.”

Flow Control Industries continues to fully support the use of American-made components and American workers in the production of our high-quality products.
